Professional Summary

- Hands-on experience in building modern web applications using Node, Express, React, MongoDB and MySQL
- Involved in gathering requirements, understanding project needs, and keeping stakeholders updated on backend progress.
- Developed secure, scalable REST APIs, implemented authentication with JWT, and managed data interactions with MongoDB.
- Comfortable writing efficient queries, creating schemas, and handling aggregation pipelines in MongoDB.
- Actively learning and adapting to new full stack technologies and development standards.
- Used Git for version control, managing branches and merges while collaborating effectively with team.
- Integrated APIs and handled data fetching using Axios.
- Worked with JSON responses to render dynamic data on the UI effectively.
- Familiar with Agile workflows, actively engaging in daily standups, sprint reviews, and demos.

Skills

Frontend - **React, Tailwind, HTML, CSS**

Backend - **Node, Express, JavaScript, TypeScript, JWT**

Database - **MongoDb, MySQL**

Other Tools and technologies - **VS Code, GIT, JSON, Postman**

Experience

WebWheel Technologies, Jr Software Developer

June 2023- Till Date

Project: Practice Management (PM) - Developed and implemented an all-in-one practice management platform featuring client tracking, smart scheduling, deadline calendars, invoicing, and an integrated CRM. The system was designed to streamline daily operations, improve team productivity, and enable data-driven business decisions for professional service providers.

Responsibilities :

- Responsible for designing, creating, and maintaining Node.js and Express APIs to support core application functionality.
- Implemented secure connections to MongoDB collections using Mongoose, handling data modeling and efficient queries.
- Created robust authentication workflows by generating JWT tokens, managing token storage, and implementing token refresh mechanisms.
- Integrated RESTful APIs with frontend teams, ensuring seamless data exchange and real-time updates.
- Worked closely with cross-functional teams to develop new backend modules, optimize API performance, and enhance overall product scalability.

Technologies used : Node, Express, JavaScript, MongoDB, Jwt, React

Certification

Full Stack Development, GeeksforGeeks

- Designed and developed a user-friendly UI and robust backend for an e-commerce application
- Integrated APIs seamlessly between the frontend and backend to ensure smooth functionality
- Utilized Postman for API testing and debugging, ensuring reliability and performance of API endpoints.

Employability Skill Development Training Programme, Naandi Foundation

- Learned working with teams and improved communication skills, creative thinking with better presentation of subject

Education

B.Tech	Avanthi Institute of Engineering and Technology, Visakhapatnam, AP
Inter	Vidwan Institute of Basic Science, Jeypore (K), Odisha
SSC	Modern English School, Jeypore, Odisha
